Despite the cautious reviewing process of the manuscript, a few minor errors still remain in the published version of this article.

Equation 5 in the manuscript should be replaced by:

$$\frac{\delta F}{\delta q} = 0 \Rightarrow q(\mathcal{G}_i | \lambda_i) = \frac{1}{Z_i} \exp(I(\mathcal{G}_i))$$
$$I(\mathcal{G}_i) = \int \prod_{j \neq i} d\mathcal{G}_j q_j(\mathcal{G}_j | \lambda_j) \ln p(\mathcal{G}, y | m)$$

where the error concerned the product inside the integral.

Also, the legend of Figure 19 should read: "Short-term predictive power of the VB-Laplace approach: the Van Der Pol system".

If you find any additional mistake in the manuscript, do not hesitate to contact me at : [j.daunizeau@fil.ion.ucl.ac.uk](mailto:j.daunizeau@fil.ion.ucl.ac.uk) .
